

cloud computing

- ✓ Q1. What is utility computing? Definition, Process, Example and best practices. → (4)
- ✓ Q2. Discuss Diff types of cloud and their ~~servic~~ diff types of services in cloud. → (8)
- Q3. Discuss characteristics of cloud computing. - (4)
- ✓ Q4. Differentiate between cluster and cloud computing. - (4)
- Q5. Differentiate between cluster and Grid computing. - (4)
- Q6. Write a brief about accessing the role of open standard. - (4)
- Q7. Discuss Architecture of openStack and List various components of openStack. → (8)
- ✓ Q8. Discuss correlation b/w Load balancing and virtualization. - (4)
- Q9. How Object storage and Block storage used ~~to~~ to store information in cloud. - (4)

Q10. Key features of cloud computing - (2)

Q11. who are cloud consumer in cloud ecosystem? - (2)

Q12. what are serverless components in cloud computing? - (2)

Q13. what are cloud enabling technologies? - (2)

Q14. Discuss limitations of cloud computing - (4)

Q15. How does resource replication takes place in cloud computing?
↳ (4)

Q16. what is on demand functionality?
↳ (2)

Q17. what are most essential things that must be followed before going for cloud computing platforms? - (4)

Q18. what are diff. cloud computing platform Databases?
